This number of the magazine opens with a wonderful shot of strange rock formation in the California desert. They range from pillars seventy-five feet high to minarets, pedestals and mounds in the shape of temples and mosques and sometimes of human figures. These strange phenomena can be seen only two hundred miles from Los Angeles.

Margaret Wade Grinager in her fashion studies gives her "Alice Through the Looking Glass" number in that all of her examples are children's frocks.

Cinema Luke under the direction of Leslie Elton has an encounter with a horse of ink and comes near decapitating him.

Charles H. Clark of New York, inventor, whose genius has been expended on the canoe, has contrived a way to right an overturned canoe when it is capsized in the water. This is a useful thing to know in case you are addicted to canoeing and are not an extremely careful person.

An unusually funny collection of laughographs concludes the magazine.
